

Adam T. Broughton, MSc, PA-C, is a seasoned emergency medicine physician assistant with over 15 years of experience in both community and teaching hospitals in the Boston area. His career is marked by a mastery of clinical skills in resuscitation, trauma management, and urgent patient care. Adam is an early adopter of bedside ultrasound, and he has shared his expertise by teaching these skills at conferences and within PA education programs. Since 2018, he has transitioned to a full-time educator role while continuing part-time clinical work, demonstrating his commitment to both practice and teaching.

Adam's educational background includes a Master of Physician Assistant Studies from Northeastern University and a Bachelor of Science in Kinesiology with a minor in Psychology from Gordon College, where he graduated Magna Cum Laude. His clinical experience spans several prestigious institutions, including Beverly Hospital, Brigham & Women's Emergency Department, and Melrose-Wakefield Emergency Department. In these roles, he has not only provided exceptional patient care but also taken on leadership responsibilities, such as supervising new graduates and developing innovative triage methods.

In addition to his clinical work, Adam has made significant contributions to PA education. He currently serves as an Assistant Clinical Professor at Northeastern University, where he directs courses, leads clinical skills training, and participates in curriculum development. His previous teaching roles include positions at Boston University and Tufts University, where he has been instrumental in shaping the next generation of physician assistants.

Adam is also actively involved in professional service and organizations. He is a board member of the Academy of Physician Associates in Legal Medicine and has served as Director at Large and Membership Committee Chair for the Massachusetts Association of Physician Assistants. His dedication to the profession is further evidenced by his role as the founder and sole writer of EMPALife.com, an educational website that shares valuable insights from his career in emergency medicine.

Throughout his career, Adam has published numerous articles in reputable journals, covering topics such as pediatric resuscitation, the role of ultrasound in emergency medicine, and the incorporation of lifestyle medicine into PA education. His work reflects a deep commitment to advancing the field of emergency medicine and improving patient care through education and innovation.
